For little explored groups, DNA barcoding can be directly used to assign organisms into hypothetical species. One feature of barcode datasets that can be used to delimit species is the so-called ``barcode gap'' in the distribution of pairwise differences.

ABGD, Automatic Barcode Gap Discovery

An Arterial Blood Gas, or ABG for short, is a test that measures the blood levels of oxygen (PaO₂), carbon dioxide (PaCO₂), and acid-base balance (pH) in the body. It's a test that is used to assess how well oxygen is being distributed throughout the body and how well carbon dioxide is being removed.

ABG Interpretation: The Ultimate Guide to Arterial Blood Gases

Getting Started You can take the AGD Fellowship Exam at an AGD Scientific Session, during the Fall Fellowship Review Course, or at a Schroeder Measurement Technologies Inc. (SMT) testing site near you. The exam consists of approximately 250 multiple-choice questions and is administered during a one-day, four-hour testing session.
