**Solutions Chapter 14**  
Chemistry

This is a case in which the solution contains a mixture of acids of different ionization strengths. In solution, the  $\text{HCO}_2\text{H}$  exists primarily as  $\text{HCO}_2\text{H}$  molecules because the ionization of the weak acid is suppressed by the strong acid.

Therefore, the  $\text{HCO}_2\text{H}$  contributes a negligible amount of hydronium ions to the solution.
