MecaStack is a 3D stack design software that is used to design steel stacks, steel chimneys, flares, exhaust stacks, etc. of a variety of dimensions and attachments. In addition, the software also performs a bending analysis of the stack to aid with the stack lifting design. MecaStack can be used to analyze self supported stacks (free standing) and guyed stacks (guy wire supported).

The software models thermal radiation and noise footprints generated by flare systems, and predicts the temperature of exposed surfaces within range. It performs full 3D flame-shape analysis with complete flexibility in the location and orientation of multiple stacks, and rapid evaluation of flare systems under different wind speeds and directions.
