### May 26, 2020 Contributor By : Enid Blyton Publishing PDF ...

The Botulinum toxin A (BoNT) is the pharmacological treatment of choice for the management of focal spasticity not responding to non-pharmacological therapy . When BoNT is insufficient to control spasticity and does not contribute to augment QOL and patient's independency, it could be useful to add other therapeutic options, including a large repertoire of non-pharmacological approaches that are well suited to focal and, to some extent, generalized spasticity management.
