CAMI Mathematics: :: : Grade 11

Exponent Review- Remember two things 1. You never multiply a base by its exponent. The exponent tells you how many times to multiply the base by itself. * 4^3 is NOT 4×3 . It is $4 \times 4 \times 4 = 64$
2. If a base is negative, it must be in parentheses to use it when you multiply. Otherwise, your answer will always be negative.

Exponents Bundle 1 - Patchogue-Medford School District

The product rule is: when you multiply two powers with the same base, add the exponents. Train 8th grade students to rewrite each exponential expression as a single exponent with this set of pdf worksheets. Also, help them develop substantial skills in finding the value of the unknown exponent and MCQ. Type 1.
